

THE PERFECT FIT FOR YOUR WRIST

LAIMER

WOODWATCH

ATTENTION: RULER IS ON ACTUAL SIZE. PLEASE BE SURE TO SELECT PRINT AT 100% („ACTUAL SIZE“) AND NOT SCALE TO FIT WHEN PRINTING IT.

FOLLOW THESE STEPS TO GET A PRECISE MEASUREMENT OF YOUR WRIST:

1. In order to ensure, that you printet the page correctly at 100% („actual size“), place a credit card on the picture of a card on the right. Your card should fit exactly to the picture and should not be too big or small. If it does not fit (minimal deviations of some mm can be ignored), check your printing configurations again.

In case you have continuing problems with printing, you can also use a normal measuring tape.

2. After ensuring, that the sheet was printed correctly, cut out the ruler template as closely to the gray border as possible.

3. Once the ruler is cut out, wrap it around your wrist and tighten it until it fits comfortably. It should not be too tight or too loose around the wrist.

4. Use a pen to mark the position of the starting point on the ruler. Round up to the next cm.

5. Go back to our website and choose your size.
